Biomass Qualification
Biomass Sourcing and Collection
Counterfactual Storage excised for Fuels
Biomass Transport to Conversion Site
Biomass Conversion (Pyrolysis)
Embodied Emissions excised for Fuels
Allocation of Tree-to-Gate CI for pyro product feedstock
Blochar Transport to Storage Site
Bio-Char Spreading
Verification of Bio-Char Removals
Credit Issuance on Registry
Credit delivery, retirement, management
Bio-Oil Transport to Injection Site
Bio-Oil Pre-Processing and Injection
Verification of Bio-Oil Removals
Credit Issuance on Registry
Credit delivery, retirement, management
Bio-Oil Transport to Refinery
Refinery co-processing into fuel products
Allocation of marginal refinery emissions to fuel products
Allocation of biogenic carbon attributes to fuel co-products
Transport of Fuel(s) to blend point
Quantification of Tree-to-Wheel CI for target fuel(s)
Quantification of GHG Reduction vs. Fossil Fuel baseline
Verification of Quantified Reductions
Credit Issuance on Registry
Credit delivery, retirement, management
Exciting Fourth Thing!
Some Stuff!
Other Stuff!
TBD!
