Proof of Sustainability

Date of Issuance:	10-30-2024
PoS ID Number:	Charm-A4-2024-10-24-63-197
Customer ID Number:	10880001A4
Neat Renewable Fuel (NRF) Batch ID	A1974-24-63

Date(s) of Shipment:	Bill of Lading Number(s):	Volume of Load (USG)	% of NRF in Shipment	Volume of NRF (USG)	Quantity of NRF (MT)	Energy Content (MJ)
10/17/2024 3:41	6672520901	7541	99.9%	7533	22.210	977240
10/21/2024 5:45	6673800901	7467	99.9%	7460	21.995	967780
TOTAL		15008		14993	44.205	1945020

General Information

Batch Production Date:	2024-10-12
Product Description:	Renewable Diesel
Conversion Process:	HEFA
Raw Material:	Tallow
Country of Origin:	USA

Only for wastes, residues and by-products (materials or products):

Raw material meets the definition for waste and residues (if applicable): ☑ Yes ☐ No

Certification Information

Certification Scheme:	RSB Global
Certificate Number:	SCS/RSB-PC-0053
Certification body:	SCS Global Services
Chain of Custody Method:	Mass Balance
Short claim (RSB or ISCC):	RSB

Neat Fuel Producer Information:

Name:	AltAir Paramount LLC
Address:	14700 Downey Avenue, Paramount, CA 90723

Customer for Attributes:

Name:	Charm Industrial
Address:	2360 S Rollie Ave, Fort Lupton, CO 80621

Information if site is managed by a third party (in case of warehouses, distributors centers, etc);

Name:	NA
Address:	NA

Greenhouse Gas Information

GHG Intensity: **15.71** g CO2eq/MJ — Default value: No

Disaggregated emissions:

Production at source (e.g. feedstock cultivation)	0	g CO2e / dry-t of
Conditioning at source (e.g. feedstock harvesting, collection and recovery)	0	g CO2e / dry-t of
Feedstock processing and extraction	0	g CO2e / dry-t of
Feedstock transportation to processing and fuel production facilities	1.16	gCO2e/MJ
Feedstock-to-fuel conversion processes	14.55	gCO2e/MJ
Fuel transportation and distribution	1.07	gCO2e/MJ
Default ILUC value	0.00	g CO2e / dry-t of

GHG value contains fuel transport emissions? ☐ Yes ☑ No — Transport Mode: Truck — Distance (km): 446

Destination Receiving RF: Old Dominion, 4550 E. Cheyenne Ave, Las Vegas, NV

For final products:

Final Carbon Intensity (g CO2 eq/MJ):	**16.78**	Fossil fuel comparator (gCO2eq/MJ):	**90**
GHG Savings (%):	**81.356%**	Lower heating value (MJ/kg):	**44.00**

Mass of neat RSB Global eligible fuel (MT)	**44.205**
Energy Content (MJ)	**1945020**
Total CO2 Emissions Reduction (MT)	**142.415**
